SUMMARY

A D3 Information Technology student with hands-on experience as a Frontend Developer and UI/UX Designer across multiple organizations. Skilled in building responsive web interfaces using HTML, CSS, Bootstrap, Laravel, and ReactJS, with a strong foundation in end-to-end UI/UX design using Figma — from user research and wireframing to prototyping and usability testing. Experienced in cross-team collaboration and technical documentation in real work environments.

WORKING EXPERIENCE

PT Halo Edukasi Indonesia (HelloCation Korea), Seoul, South Korea Jan – Jun 2026

IT Staff Volunteer

- Built and published the organization's website front-end using WordPress, ensuring a consistent and functional online presence
- Maintained website performance and provided hands-on technical support for live events, including Zoom operation and OBS streaming management
- Contributed to the planning and execution of UI updates for the HelloCation Korea website to improve overall user experience

CMLABS, Malang, Indonesia Aug 2025 – Feb 2026

System Analyst Intern

- Produced 4 system documentation artifacts – Use Case Diagram, Flowchart, ERD, and Sitemap – as the structural foundation for a CRM platform development.
- Conducted comprehensive functional testing across all system features to ensure alignment with documented requirements prior to implementation.
- Coordinated with cross-functional teams to support successful CRM implementation, contributing to a more streamlined development workflow.

PT Vinix7 Aurum, Sleman, Indonesia Aug – Dec 2025

Web Developer & UI/UX Designer Intern

- Designed an end-to-end UMKM Portal experience using Figma, covering user research, wireframing, prototyping, and usability testing; project successfully deployed online as the primary internship deliverable.
- Built and published the foundational front-end of the website using HTML, CSS, JavaScript, Bootstrap, and GitHub Pages delivering a responsive and accessible interface.

PROJECT EXPERIENCE

Boarding House Management Information System Apr – May 2026

Laravel, MySQL, Bootstrap

- Designed a multi-role web application supporting 3 user types; received strong academic evaluation from supervising lecturer.
- Developed UML diagrams (use case, activity, ERD) as the structural foundation for system flow and database design.

SportOn Digital – Sports Equipment E-Commerce Website Jan – Feb 2026

ReactJS

- Developed a product management system for a sports equipment e-commerce platform using ReactJS.

- Implemented filtering logic and client-side state management to support a dynamic product browsing experience.

E-Score – Student Assessment Application

Sep – Nov 2024

UI/UX, Web Development

- Designed a student assessment application from UI/U concept through to full web implementation using a user-centered approach.
- Produced comprehensive design documentation including user flow, wireframes, mockups, and activity diagrams based on the User Centered Design (UCD) method.

Gapura UB – University Application Redesign

Mar – May 2024

UI/UX Design

- Conducted feature and design gap analysis on the existing university application and executed UI/UX improvements to address identified shortcomings.
- Led team task distribution and project timeline management throughout the redesign process.
