SUMMARY

D3 Information Technology fresh graduate with hands-on experience as a Frontend Developer and UI/UX Designer across multiple organizations. Skilled in building responsive web interfaces using HTML, CSS, Bootstrap, Laravel, and ReactJS, with a strong foundation in end-to-end UI/UX design using Figma — from user research and wireframing to prototyping and usability testing. Holds certifications in BNSP Junior Web Developer, Google AI Essentials, and Web Programming from Standard Chartered Foundation's FYEP. Experienced in cross-team collaboration and technical documentation in real work environments.

WORKING EXPERIENCE

PT Halo Edukasi Indonesia (HelloCation Korea), Seoul, South Korea

Jan – Jun 2026

IT Staff Volunteer

- Built and published the organization's website front-end using WordPress, ensuring a consistent and functional online presence
- Contributed to the planning and execution of UI updates for the HelloCation Korea website to improve overall user experience, coordinating with the team on live event technical support (Zoom, OBS streaming).

CMLABS, Malang, Indonesia

Aug 2025 – Feb 2026

System Analyst Intern

- Collaborated with cross-functional development teams to translate CRM feature requirements into structural documentation (Use Case Diagram, Flowchart, ERD, Sitemap), strengthening my ability to read and implement technical specifications accurately.
- Conducted functional testing across all system features prior to implementation, building close attention to detail — a skill directly transferable to verifying UI behavior and frontend quality assurance.

PT Vinix7 Aurum, Sleman, Indonesia

Aug – Dec 2025

Web Developer & UI/UX Designer Intern

- Built and published the front-end of a UMKM Portal website using HTML, CSS, JavaScript, and Bootstrap, delivering a responsive and accessible interface as the primary internship deliverable, deployed via GitHub Pages.
- Designed the end-to-end UI/UX experience in Figma — covering user research, wireframing, prototyping, and usability testing — ensuring interface implementation matched validated design decisions.

PROJECT EXPERIENCE

SportOn Digital – Sports Equipment E-Commerce Website

Jan – Feb 2026

ReactJS

- Developed a product management system for a sports equipment e-commerce platform using ReactJS, building reusable, component-based UI.
- Implemented filtering logic and client-side state management to support a dynamic, responsive product browsing experience
- Deployed the application on Vercel.

Boarding House Management Information System

Apr – May 2026

Laravel, MySQL, Bootstrap

- Designed a multi-role web application supporting 3 user types with a responsive Bootstrap front-end;

received strong academic evaluation from supervising lecturer.

- Developed UML diagrams (use case, activity, ERD) as the structural foundation for system flow and database design.

E-Score – Student Assessment Application

Sep – Nov 2024

UI/UX, Web Development

- Designed a student assessment application from UI/UX concept through to full web implementation using a user-centered approach.
- Produced comprehensive design documentation including user flow, wireframes, mockups, and activity diagrams based on the User Centered Design (UCD) method.

Gapura UB – University Application Redesign

Mar – May 2024

UI/UX Design

- Conducted feature and design gap analysis on the existing university application and executed UI/UX improvements to address identified shortcomings.
- Led team task distribution and project timeline management throughout the redesign process.
